DETAILED ACTION

Election/Restrictions

 Applicant's election with traverse of Species A in the reply filed on October 1, 2008 is acknowledged. The traversal is on the ground(s) that all species are sufficiently related. This is not found persuasive because the species differ by design, operation and effect and are considered by the examiner to be distinct.

The requirement is still deemed proper and is therefore made FINAL.

Claims 7-12, 15, 18-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on October 1, 2008.

Specification

The abstract of the disclosure is objected to because

The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. In particular, the word "said" appears in the second to last line of the Abstract.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3657

Claims 1-6, 13, 14, 16, and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant claims providing absorption of a filtered vibratory wave transmitted to a structure over "a very wide, very wide band of frequency" in claim 1. The limitation appears to be inadvertently duplicated. Additionally, the limitation renders the claim indefinite since it is unclear what encompasses "very wide" and there is no clear definition to the metes and bounds of the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

 Claims 1-6, 13, 14, 16, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Capdepuy et al. (US 6,068,081).

Capdepuy et al. disclose process to damp and filter the amplitude of mechanically-originated vibrations of a structure to be uncoupled, wherein the incident vibratory wave is filtered associated with damping, by providing absorption of the filtered vibratory wave transmitted to the structure over a very wide band of frequency and mechanical load amplitude applied to said structure. (Figure 3)

Conclusion

Application/Control Number: 10/566,645

Art Unit: 3657

 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hawkins et al. and Goldbach et al. each similar structures.
